

E-MAIL BLAST – E-MAIL MARKETING SOLUTION

Elpine Technologies Limited has developed a state of the art email marketing solution (E-Mail Blast) for companies who wish to directly deliver relevant information and marketing messages to your customers.

E-mail marketing is a highly effective method for getting the words out to a targeted audience. We provide a fully automated software platform that can be quickly implemented with low initial costs. Whether you need to send out daily or monthly e-mail newsletters in HTML or Plain Text, we have the right solution for you.

Our E-Mail Blast platform provides:

- Dedicated server with dedicated SMTP Gateway on dedicated bandwidth for high speed e-mail delivery
- E-mail blast at a rate of 18,000 emails per hour¹
- Intelligent automated sending retries during the predefined delivery schedule

Advanced Features

- Fully customizable email content for 'personal' e-mail delivery
- Submit e-mail newsletter files via FTP
- Clients can set the sending schedule freely, by submitting files in special predefined naming convention
- Web administration to monitor e-mail sending progress
- Web administration to terminate sending (in case of an error)
- Statistics on sending and reading
- E-Mail list management (monitors invalid and bounced email addresses)
- Additional features available upon request
